From the **President**

Dear Members,

2005 is already coming to its end. I thank all of you for your support and your fidelity to our Association. In those busy days it is not so easy to find the time for extra activities beside our professional obligations and family responsibilities. Many of you could participate actively to one or the other Swiss Crows events though.

I'm looking forward to seeing you again at our General Meeting or at another occasion next year.

In the name of the Board of Directors, let me address our sincere wishes of happiness and healthiness to you and your family for 2006!

Sincerely,

Christian Guillaume

Past Events

ELITE Tour, June 2005

Thank René Zürcher, a great number of our members had the opportunity to travel to Heuberg Range in Germany, and could perceive "live" what the largest Air Defence exercise in Europe is about. The Visitor Organisation of ELITE (German Air Force) was efficient and its staff is ready to welcome you next year!

Visit of Siemens Schweiz AG, 16 November 2005

Our Vice President, Richard Morva, organized a remarkable presentation of Siemens Schweiz AG in Zurich. About 30 people had the opportunity to discover what Siemens can offer in terms of variety of products and in terms of quality. Its CEO, Mr Wieser, welcomed the participants, presented an overview of his firm, and provided valuable information on *Tetrapol* (Siemens is a full member) and *Polycom* (Radio Security Network). Mr Aregger covered other important projects such as *Datalink-* and *KOMSYS-FLORAKO*. He also presented a new computer security concept called *Lock-Keeper*. *FIS-LW* (Führungsinformationssysteme der Luftwaffe), *Flinte* and the brand new concept *C⁴I²STAR* (Command, Control, Communications, Computers, Information, Intelligence, Surveillance, Targeting Acquisition and Reconnaissance, *phew...!*) were introduced by Mr Klötzli. The enthusiastic Mrs Toennis guided us with expertise through the impressive Inforama. At the end, we were invited for a delicious dinner in a local restaurant.

Next Events
